OVERVIEW OF “THE CHILLARS”

I have decided to create a proposal for a website for a catering business called The Chillars located in Polokwane in Limpopo. Currently don't have any Website meaning they only rely on social media platforms .

History of The Chillars

The Chillars is a local food and catering business based in Mankweng, Limpopo. The business makes delicious homestyle meals, traditional platters and event food for residents, students, and parties. They are popular for their great taste and relaxed vibe, but they do not have a website. This new site will help hungry locals browse their food menu online.

MISSION

Create Website that will showcase the fresh, tasty and affordable homestyle meals that are bringing people together and allow customers to order seamlessly on the website

VISION

To be the most popular local catering and kitchen brand in Mankweng known for its excellent flavor and friendly service.

TARGET AUDIENCE

Daily Eaters: Local workers and students looking for a delicious, ready-made lunch or dinner.

Event Hosts: Families and groups hosting small parties, graduations or celebrations who need large food platters.

Website goals and objectives

WEBSITE GOALS	WEBSITE OBJECTIVES
• Create a simple online food page for the business.	• build a simple 1-page website that is easy to read on mobile phones.
• Show beautiful photos of freshly cooked meals and platters.	• Show a clean digital menu with simple price lists.
• Help local customers view prices before they call to order.	• Put a clear "Call to Order" button at the top of the page.

KEY PERFORMANCE INDICATORS

- Track the number of different local users on the site monthly.
- Count how many users click the embedded map to find the shop on the R71.
- Monitor the percentage of users who leave the website after viewing the page.
- Number of orders processed on the website and the Physical Store

PROPOSED WEBSITE FEATURERS AND FUNCTIONALITY

- Top Bar: The Chillars logo and phone number.
- Main Banner: A big photo of a delicious meal with the words: "Good Food. Great Vibes."
- Food Menu: Clean text blocks showing daily meals, platters, and sides with prices.
- Bottom Bar: Operating hours, collection address, and phone links.

DESIGN AND USER EXPERIENCE

Colour Scheme

- Primary colour: Warm Orange to represent fresh cooking, appetizing meals and flavour.
- Secondary colour: Warm chocolate brown for text and borders
- Background colour: Creamy off-white for a clean, easy-to-read look.

Typography

- Headings font: Playfair Display (a classy font for big food section titles).
- Body text font: Arial or Roboto (a clean, simple font for easy reading of prices).
- Font hierarchy: Large, bold titles for headings, medium sub-headings and small plain body text for food descriptions.

Layout and Design Approach

- Visual approach: An elegant visual representation of food photos which are displayed cleanly using plenty of white space.

User Experience Considerations

- Mobile-first view: Easy scrolling on phones since most local customers browse menus using their smartphones.
- clear navigation: A clear sticky menu bar to find contact and menu info instantly.

TECHNICAL REQUIREMENTS

Hosting and domain requirements

I will host the website with the help of absolute hosting. Absolute hosting is a company that host websites for various business at an affordable price

The name of the domain will be thechillarsza.co.za

LANGUAGES

- JAVASCRIPT
- CSS
- HTML

TIMELINES AND MILESTONES

Week 1: Research about the the chillars, plan the text content,and sketch a basic design.

Week 2-3: Create the web pages using HTML and add your text.

Week 3-4: Style the website with CSS colors, add food and platter photos, and test it on a phone and PC.

Week 4-5: Enhancing Functionality by adding javaScript

End of Week 5- Submitt the fully functional Website

BUDGET ESTIMATED

1. Setup & Development (Once-off Fee)

Custom Website Design & Development: R 3000

Domain Registration (. co.za): R 80

Total Upfront Investment: R 3 080

2. Ongoing Maintenance (Monthly Fee)

Premium Business Web Hosting: R 200 /month

Monthly Security & Content Updates: R 500 /month

Total Ongoing Monthly Fee: R 700 /month
